1. BACKGROUND OF THE PROJECT

Environmental protection is one of the basic and fundamental European values. Preservation and improvement of this concept implies a collective partnership action, both within the EU and beyond. In order to facilitate the adoption of environmental (ecological) values and environmentally (ecologically) responsible action, it is necessary to educate citizens, especially young people, about the importance of environmental protection. The research and comparative analysis of the environmental awareness of youth from V4 countries and Serbia as a country in transition, will set the framework for mutual cooperation on the adoption of environmental principles, both the institutional and non-institutional level (Rickinson, 2001; Wray-Lake, et al., 2008). Considering that most of the
environmental problems are regional or global, it is required to join actions of all interested countries in order to preserve the concept of sustainability. The theme that was specially elaborated in documents about environmental protection of the European Union is the enlargement of the EU. In the process of joining the EU, candidate countries, among which is Serbia, will have to synchronize their environmental standards with European, but also achieve sustainability by increasing environmental awareness, which is foreseen the current Action Plan for the Protection of the Environment - 7th Environmental Action Programme 2010 -2014 (ec.europa.eu). That would be very helpful for Serbia in order to adopt experience and knowledge of V4 countries which are EU member states.

The aim of this project is reflected in continuation of cooperation between the V4 countries and Serbia in terms of the concept of sustainability and environmental protection. As a future holder of improvement and promotion of environmental values, it is important to follow and encourage the awareness of youth in this regard. The sustainability of natural resources and prevention of environmental problems depends of the level of environmental awareness of students as future academic citizens and decision makers, which is the goal of this project.

Within the project, joint research of all partner institutions was carried out, which was based on the surveys to collect students opinion on „Environmental awareness“. The original questionnaire for the survey was obtained from the literature (de la Vega, 2004) and than adopted by all participant institution to be used in our research environment. Students from all partner institutions were included in the survey. Online tool is available here: https://docs.google.com/forms/d/1t1LSSuc08Yp7abvENqBJK9ocX-Zhqknw8PbnIIHDs/viewform?c=0&w=1

After collecting 430 response and processing the results of the survey, a comparative analysis of the conclusions, with a view to defining similarities and differences of environmental awareness of young people from participating countries, was done.

Final results of the analysis was presented during the Students Symposium on 28-30 of May 2016 in Bor (Serbia). Organization of international student symposium on this subject, was planned and facilitated where students had a chance to present their scientific papers from environmental issues and meet their colleagues, and the general public, with the existing practice of application of ecological principles in their countries. The study and the reports of all participants will be summarized in the monograph that will be useful as practicum for easy practical and effective implementation of EU legislation on environmental protection in all partner countries. Also, the results will help to indicate the best way of raising environmental awareness among youth, thus ensuring the most perspective environmental future of Europe.
2. PARTNERS OF THE PROJECT

Official V4 partners that participated in the research and will participate in the event on 28-30 of May, are:

1. Óbuda University, Keleti Faculty of Business and Management - Hungary: http://kgk.uni-obuda.hu/
2. Institute of Production Engineering, Faculty of Management, The Czestochowa University of Technology - Poland: http://kgk.uni-obuda.hu/
3. University of South Bohemia, Faculty of Economics - Czech Republic; webpage of the partner institution: www.ef.jcu.cz
4. University of ss. Cyril and Methodius in Trnava, Faculty of Mass Media of UCM - Slovakia: http://www.ucm.sk
5. The Managers of Quality and Production Association - Poland; webpage of the partner institution: http://qpij.pl
7. Engineering Management Department of Technical Faculty in Bor, University of Belgrade: www.menadzment.tf.bor.ac.rs

3. PROGRAM AND THE ACTIVITIES

The program of the Conference IMKSM2016 and the Students symposium, is available at the official web page of the conference: http://mksm.sjm06.com/ It can be noticed that record number of participants and institutions were present on the IMKSM meeting this year.

3.1. Events of the IMKSM2016 project

March 2016, Participants of the project finalized the framework of the joint research and the questionnaire was developed to be used for assessing the environmental awareness of young people, among which the students of all partner Universities on the project. The final version of the questionnaire is presented here: http://media.sjm06.com/2016/02/ENVIRONMENTAL-SURVEY-III-iteration-14-March.doc.

In frame of this activity, representatives of each partner institution had collaborated to develop the final version of the survey tool. Also, during the March 2016 the initial online meeting was organized to discuss the next steps in the research. This was done using the online virtual meeting on Skype (https://join.skype.com/rIbaVNM1svjg).

During initial meeting, the final online platform was developed for surveying the young population with the questionnaire. The link to this online survey tool is available here: https://docs.google.com/forms/d/1t1LSSuco8Yp7a b v E N q B J K 9 o _ c X - Zhqknw8PbnIIHDs/viewform?c=0&w=1&usp=mail_form_link

March - April 2016, In this period of time, all partner institutions promoted the online questionnaire to their students. It was expected that all institutions will attract at list 50 respondents. Actually, larger number of responses was collected: 430 in total. The results of survey are collected in the central data base.

April - May 2016, results of the survey was processed and analysed using the linear and nonlinear statistical data analysis. This enabled obtaining the level of awareness of the young population on environmental issues. Also, comparative analysis was done for different countries included in the project. Obtained results gave the directions for further development of the actions on the research of the topic. This activity was
completed on 15th of May 2016.

28-30 May 2016, International Students Conference was organized. This conference was organized in the frame of the International Students Symposium of Strategic Management (http://mksm.sjm06.com/). It was expected that at this event up to 2 professors and up to 4 students will participate, from all project partners institution. There was a special section of the conference, where all participants of the project presented their reports on the environmental awareness level in their countries/regions. This reports will be published in the official book of proceedings of the IMKSM2016 and in the official Monograph of the project. The deadline for the abstract submission was 10th of May 2016. The template for the manuscript preparation is available here: IMKSM16 template. Also, there was a workshop for the students where some practical environmental case studies have been introduced and elaborated, on the issue of Environment protection and CSR. The conference and the V4 project, were announced on all social networks and on Regional TV Bor: http://rtvbor.rs/video-m/player/gosti-budilice/budilica-gostovanje-prof-dr-ivan-mihajlovi%C4%87,-,-28-maj-2016-rtv-bor

29th of May 2016, The final meeting of the representatives of the partner institution was organized (for professors and researchers). At this meetings, the representatives of all partners agreed on the scope and the contents of the international monograph which will result from this project.

June-July 2016, publication of the Monograph. The template for the manuscripts to be published in the Monograph is available here: V4-Monography-IMKSM-2016-template-ENG2. This monograph is consisted of all research results developed during this project as well as reports on environmental awareness of all partners.

All additional details about further development of the project activities will be available on the web page of the project (http://mksm.sjm06.com/round-table-2016-visegrad-fund-project/), during the period of the project implementation.

4. CONCLUSIONS

Following conclusions can be emphasized from the meeting, organized in frame of the Project:

1. All partners on this project will sign the bilateral agreement for future cooperation on faculty level;
2. Selected papers from the IMKSM2016 will be published in this issue of Serbian Journal of Management (www.sjm06.com ) and in Acta Oeconomica Universitatis Selye (http://www.acta.selyeuni.sk) ; The papers should be arranged in accordance to instructions to authors available at the web sites of those two journals;
3. All reports about present situation in Environmental awareness in partner countries and possibilities for improvement and actions between V4 countries and Serbia will be published in the Monograph, with the title: Environmental awareness as a universal European Value.
4. It was agreed that the partners on this project will continue with scientific and research cooperation in the future. They will be engaged in near future on preparation of larger projects, possible in the frame of HORIZON 2020.
Acknowledgement: The organizing committee of the IMKSM2016, wish to express deep gratitude to all partner institutions which supported this project, also to International Visegrad Fund for financial support and contribution, as well as the Ministry of Education Science and Technological Development of Republic of Serbia for additional financial support of some of the conference activities.
