ABSTRACT

The abstract should be self-contained, free of citations and abbreviations, and limited to 250 words. (Style Abstract: 9 pt, italic, pt, justified). The abstract should be

self-contained, free of citations and abbreviations, and limited to 250 words. (Style Abstract: 9 pt, italic, pt, justified, 0.75 pt left and right indentation)

Key words: key word 1, key word 2... up to 6 keywords

1. INTRODUCTION

Main text: The main text may contain: Introduction, Theoretical part, Experimental, Results and Discussion and Conclusion (optionally). It should clearly convey the purpose of the study, the approach, and the key findings. Text should be typed in Times New Roman and Greek letters in the character font Symbol, font size 10, with 1.15 spacing. The text should be in double-column format. All pages of the manuscript must be numbered continuously. (Style Main text: 10 pt; paragraph format: justified alignment, left and right indent 0 pt, space before and after 0 pt, first line indent 0.5 cm, 1.2 line spacing).

2. THEORETICAL PART

It gives, if necessary, the theoretical basis of the work performed, such as models etc. Used references must be complete and accurate. All references should be numbered consecutively and citations of references in the text should be identified using numbers in square brackets (e.g. "as stated in [3]"; "as explained in [3,4]"). The references that are not cited within the text will be automatically removed. **Units** of measurement should be presented simply and concisely, using the International System of Units (SI). The use of litres (l) and Celsius degree (°C) is acceptable. **Abbreviations** should be specified, in parentheses, when first mentioned.

3. EXPERIMENTAL

3.1. Materials and methods

For **Plants, animals and microorganisms** should be given full binominal Latin name, *in italic*, in the title, abstract, headings and legends of tables and figures, and at the first mention in the text. If the list of species is considered, then it goes with the author's name and year of description, i. e., *Maja squinado* (Herbst, 1788), and the belonging to the system species is indicated in the title (*Crustacea, Decapoda, Brachyura*). A collection number, strain number or name should be quoted, e.g. *Escherichia coli* (ATCC 8739), *Maja squinado*. Thereafter abbreviate them in the text, e.g. *E. coli*, *M. squinado*.

Latin words, as well as the names of species, should be in italic, as for example: *i.e.*, *e.g.*, *in vivo*, *Candida albicans*, etc. The branching of organic compound should also be indicated in italic, for example, *n*-butanol, *tert*-butanol, etc.

3.1.1. Synthesis

Tables, figures and/or schemes must be embedded in the main text of the manuscript and should follow the paragraph in which they are mentioned for the first time. Tables must be prepared with the aid of the WORD table function, without vertical lines. The minimum size of the font in the tables should be 9 pt. Table columns must not be

§ Acknowledgments (not obligatory) of people, grants, funds, etc. should be placed in a separate section before the reference list. The names of funding organizations should be written in full.

* Corresponding author

formatted using multiple spaces. Table caption must be placed above corresponding Table, while Captions of the Illustrations (Figs. Schemes...) must follow the corresponding item. The captions, either for Tables or Illustrations, should make the items comprehensible without reading of the main text (but clearly referenced in), must follow numerical order (Roman for Tables, Arabic for Illustrations), and should not be provided on separate sheets or as separate files.

Figures, photographs, line drawings, graphs (Styles Figure and Figure Title)

Fig. 1 Title of figure

Table I Title of table (Style Table title)

| | Compound 1 | Compound 2 | Compound 3 | Compound 4 |
|---------------|------------|------------|------------|------------|
| Melting point | | | | |
| Color | | | | |
| Yield | | | | |

4. RESULTS AND DISCUSSION

Formulae and Equations must be written with great care using corresponding formula/equation editor. Equations should be numbered (1), (2), etc. Equations should be typewritten and, with the number, placed in parentheses at the right margin. Reference to equations should use the form "Eq. (2)" or simply (2).

$$h_{ci} = \frac{q}{S(T_{wi} - T_b)} \quad (1)$$

5. CONCLUSION (OPTIONALLY)

Optionally, it should indicate the significant contribution of the manuscript with its applications.

REFERENCES

Use APA citation style for references. Order of references in reference list alphabetically, by the last name of the first author of each work, or if there is no known author, by title.

- List authors' last names, followed by initials.
- For works with two authors, use an ampersand "&" instead of "and" to separate the authors' names: 'Taylor, P.', not 'Taylor, Peter'.
- If your reference list contains more than one item by the same author(s), list works in chronological

order (oldest first) and add a lower case letter (a, b, c, etc...) after the year.

Gaynor, K. (2006a). *Librarianship for dummies*. Oxford: Oxford University Press.

Gaynor, K. (2006b). *Imagining Italy*. Victoria: Trafford Press.

- Do not capitalize every word in the title. Only the first letter of the first word of the title and subtitle should be capitalized.
- No URLs are required for citations to articles accessed online that provide a DOI. Give URL of the journal,
- Retrieved Date is only required for online sources that may change (ie. Wikis or blogs)
