

1.1. Subheading (Style Heading 5: 10 pt, italic, left, indentation left 5 pt, spacing before 12 pt, after 6pt, keep with next, keep lines together)

Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text. Sample of main text.

Equations should be prepared using Equation Editor as a part of MS Word, with styles and sizes as defined (see Fig. 1).

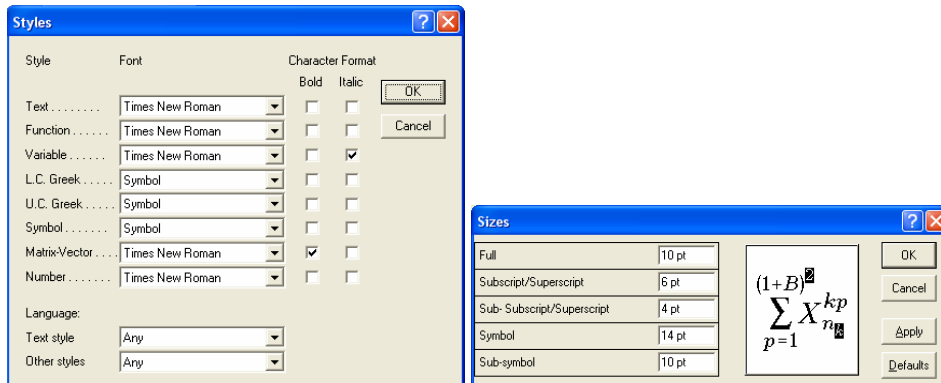

Fig. 1 Title of figure

$$h_{ci} = \frac{q}{S(T_{wi} - T_b)} \quad (1)$$

Paragraph format for equations are (Style Equation): left indentation, 6 pt before and after, equation is at position of centered tab at 6.25 cm, number of equation is at position of right tab at 12.7 cm.

Illustrations: figures, photographs, line drawings, graphs
(Styles Figure and Figure Title)

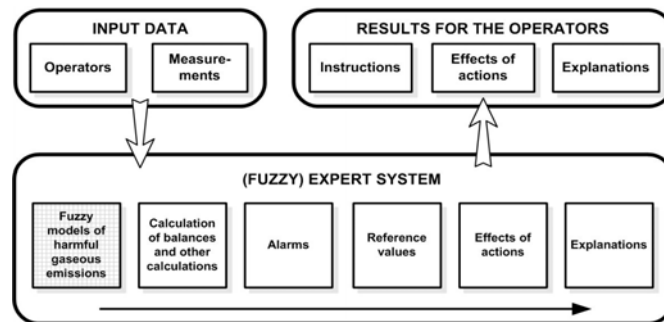

Fig. 2 Title of figure

All illustrations (figures, photographs, line drawings, graphs) should be numbered in series and all legends should be included at the bottom of each illustration. All **figures, photographs, line drawings and graphs**, prepared in electronic form, should be converted in TIFF or JPG (max quality) files, in 300 dpi resolution, for superior reproduction. Figures, line drawings and graphs prepared using elements of MS Drawing or MS Graph must be converted in form of pictures and unchangeable. All illustrations should be planned in advance so as to allow reduction to 12.75 cm in column width. Please review all illustrations to ensure that they are readable.

Tables

Table 1 Title of table (Style Table title)

System	Symbol
Without delay	+
Delay $h = 1$	-
Delay $h = N = 34$	*

All tables should be numbered with consecutive Arabic numbers. They should have descriptive captions at the top of each table and should be mentioned in the text.
