

# Instructions for Authors

Submitting Manuscripts to *Journal of the Serbian Society for Computational Mechanics*

## Goals and Scope

Journal of the Serbian Society for Computational Mechanics is the official journal of the SERBIAN SOCIETY FOR COMPUTATIONAL MECHANICS, member of International Association for Computational Mechanics (IACM) and European Community on Computational Methods in Applied Sciences (ECCOMAS). Journal of the Serbian Society for Computational Mechanics (JSSCM) publishes original research articles dealing with computational methods in mechanics and in other fields of applied sciences, as well as applications of these methods in science, engineering and medicine. Membership in the Serbian Society for Computational Mechanics is not a prerequisite for publishing articles in the JSSCM and the Journal is open for contributions from around the world. Articles are published without charge to the author except in certain circumstances such as color figures.

## Preparing the Article

Journal of the Serbian Society for Computational Mechanics publishes peer reviewed papers. Articles should be prepared in MS Word. Please use the template given on the web: [www.sscm.kg.ac.rs/jsscm/word/template.doc](http://www.sscm.kg.ac.rs/jsscm/word/template.doc) Suggested paper organization is Abstract, Introduction, Methods, Solutions, and Conclusions.

## Paper Submission

Manuscripts must comply with the instructions specified in Template.

Submission is exclusively electronically via the web, [www.sscm.kg.ac.rs/jsscm](http://www.sscm.kg.ac.rs/jsscm)

Size of the article is not limited, but the recommended size is between 10 and 20 pages. Notice of the acceptance or rejection of the manuscript may take four to eight weeks because reviewers are usually international.

## Acceptance

The Editor selects in confidence a reviewer who reports about the quality of the submitted article and gives recommendations. The Editor consults members of the Editorial Board closest to the subject of the article and, with the reviewer's opinion and recommendations, decides about the acceptance for publication.

The corresponding author of the article is informed about the Editor's decision.

## Paper Originality

If the manuscript is accepted for publication, the corresponding author must sign the Copyright Form prior to publication. The author guaranties originality of the paper and that the content has not been published elsewhere. For already published parts of the paper (as figures or tables) which are copied from another source, adequate permission must accompany the manuscript, with the corresponding reference to the source paper. The JSSCM does not restrict the author to use the material published in JSSCM except that the author must refer to the paper in JSSCM as the source.
